

List of international conferences, symposia, congresses on Earth Sciences

Summarized by Prof. Nataliya Nikitina
IAGETH First Vice President

<http://www.geoethics.ru/>

2014

January 4 – 5, 2014

3rd International Conference on Climate Change and Humanity - ICCCH 2014

Melbourne, Australia

<http://www.iccch.org/>

January 6 – 11, 2014

2014 Winter Conference on Plasma Spectrochemistry,

Amelia Island, Florida, USA

http://icpinformation.org/2010_Winter_Conference.html

January 14 – 17, 2014

8th International Conference on Physical Modelling in Geotechnics 2014 (ICPMG)

Perth, Australia

<http://icpmg2014.com.au/>

January 21 – 23, 2014

46th Annual Canadian Mineral Processors Conference

Ottawa, Ontario, Canada

<http://www.cmpsoc.ca/annual-conference.cfm>

January 22 – 23, 2014

In Situ Oil Sands Water Treatment & Re-Use Optimization, Calgary, Alberta, Canada

<http://www.in-situ-oil-sands-water.com/>

January 23 – 24, 2014

State Aid: Energy and Environment - Review of Critical Issues

Maastricht, the Netherlands

The seminar is designed for officials from central and regional ministries and/ or other authorities dealing with state aid and environmental protection issues and managers from public or private enterprises who may be involved in the formulation and implementation of environmental state aid schemes.

<http://seminars.eipa.eu/en/activities09/show/&t...>

January 24 – 25, 2014

2014 International Conference on Geological and Civil Engineering (ICGCE 2014)

Macau, China

<http://www.icgce.org/>

January 28 – 29, 2014

GeoUtilities Conference 2014 “Increase productivity, decrease costs and improve the overall health of your network infrastructure management”

London, United Kingdom

GeoUtilities 2014 provides you with in-depth market and practical insight into how utility companies across Europe and the US are building this robust strategy for investment in geospatial network infrastructure management solutions
<http://www.geospatialutilities.com>

January 28 – 30, 2014

14th National Conference and Global Forum on Science, Policy and the Environment "Building Climate Solutions"

Washington, DC, USA

<http://www.buildingclimatesolutions.org/topics/view/523af4fc0cf264abcd6728be/>

January 29 – 31, 2014

1st theoretical and practical conference “Geology, Geophysics and Mineral Materials of the Siberia”

Siberian Research Institute of Geology, Geophysics and Mineral Resources, Novosibirsk, Russia

<http://www.sniiggims.ru/Lists/List1/DispForm.aspx?ID=12&ContentTypeId=0x0100B6E7812D92D6934FBC0776DF110567E0>

E-mail ZaitsevSP@sniiggims.ru; E-mail: geology@sniiggims.ru

January 30 – February 1, 2014

Millennium Development Goals (MDGs) in Retrospect: Africa's Development Beyond 2015

Edmonton, Alberta, Canada

http://www.afsualberta.org/2#!_2/conference

February 4 – 5, 2014

Workshop: Earthquake Early Warning System, Applications to the Ibero-Maghrebian Region,

Madrid, Spain

Contact: workshop_EEWS@ucm.es

<http://www.conference-service.com/conferences/geophysics-and-geology.html>

February 06 – 07, 2014

Vertical geology conference 2014 - from remote sensing to 3D geological modeling

University of Lausanne, Switzerland

(Short course 05 February 2014)

<http://www3.unil.ch/wpmu/vgc14/>

February 8 - 10, 2014

67th EXECUTIVE COMMITTEE MEETING

Goa, India

http://iugs.org/uploads/IUGS_EC67_Provisional%20Agenda.pdf

February 9 – 14, 2014

AGU Chapman Conference on Magnetosphere-Ionosphere Coupling in the Solar System

Yosemite National Park, California, USA

<http://chapman.agu.org/magnetosphere/>

February 9 – 14, 2014

Exoclimes III: The Diversity of Planetary Atmospheres

The objective of this meeting is to bring together Earth, Solar System and Exoplanet atmosphere specialists to discuss recent results and the way ahead. The general emphasis is on comparative planetology, with each specialty bringing a different angle to the study of planetary atmospheres.

University of Exeter, Davos, Switzerland
<http://www.exoclimes.org/>

February 12 – 14, 2014

4th International Conference on Climate Change and Sustainable Management of Natural Resources

Gwalior, Madhya Pradesh, India

<http://www.itmuniversity.ac.in/TIMS/>

February 17-18, 2014

EAGE/FESM Joint Regional Conference Petrophysics Meets Geoscience "From Nano Pores to Mega Structures"

Kuala Lumpur, Malaysia

The Formation Evaluation Society of Malaysia (FESM) together with EAGE wants to invite all subsurface disciplines to attend this regional Asia-Pacific Conference and to share and discuss the many subsurface issues that challenge us in our daily work. We will come together for two days of technical papers and discussions to further integrate the two disciplines, to share best practices of reservoir characterisation and our fascination of the subsurface. Different approaches have been applied in the past by the individual disciplines to evaluate reservoir rock properties at various scales by combining different physical measurements from cores, logs and seismic surveys to relate the physical processes at the nano-scale pore structures to the reservoir characterisation at seismic scale. The request to fully integrate all available subsurface data fostered the development of joint workflows to generate 3D reservoir models.

As the region is expanding into EOR, and there is a need to fully understand the subsurface before we attempt to extract the last remaining oil. We are also excited about some of the work coming out of research labs and institutes where we see the outcome of many studies very relevant for the understanding and characterisation of the physical behaviour of the reservoir rocks.

<http://www.eage.org/events/index.php?eventid=1058&Opendivs=s3>

February 21 – 23, 2014

2014 International Conference on Geology and Geological Engineering (ICGGE 2014)

Pune, India

<http://www.saise.org/icgge2014>

February 23 – 28, 2014

Ocean Sciences Meeting

Main meeting aim is to exchange knowledge and discuss issues covering the broad spectrum of marine science disciplines, including physical, biological, chemical and geological oceanography, technology and multidisciplinary topics.

Honolulu, Hawaii, USA

<http://sites.agu.org/meetings/>

February 25 – 26, 2014

NGWA Conference on Hydrology and Water Security in the Rio Grande Basin (#5034)

Crown Plaza Albuquerque, Albuquerque, New Mexico, USA

<http://www.ngwa.org/Events-Education/conferences/Pages/5034feb14.aspx>

February 25-27, 2014

SPE/EAGE European Unconventional Resources Conference and Exhibition "Unlocking European Potential"

Vienna, Austria

Both SPE and EAGE have identified the increasingly important role unconventionally trapped oil and gas production is playing in the world energy mix. The theme for this conference is "Unlocking European Potential". This event comes at a critical point in the development of unconventional re-

sources in Europe, with some countries forging ahead while others have instigated moratoria. The public, environmental groups and politicians hotly debate the possible benefits of this new source of energy and the perceived environmental risks. This event provides an opportunity to address and discuss both the technical and non-technical challenges across a broad spectrum of expertise. The event is aimed at developing a better understanding of not only the technical and technological solutions to economically producing unconventional oil and gas, but also at identifying appropriate regulatory approaches and technological developments that will help address non-technical and environmental challenges such as access, footprint, water use, and noise. This event is an excellent way for a wide range of professionals in the oil and gas industry to come together to share best practices and to discuss ideas for further improvement with key stakeholders.

<http://www.eage.org/events/index.php?eventid=948&Opendivs=s3>

February 26 – 27, 2014

International Conference on Stormwater and Urban Water Systems Modeling

CHI - Computational Hydraulics Institute, Toronto, Canada

<http://www.chiwater.com/Training/Conferences/conferencetoronto.as>

March 6 – 9, 2014

Soil's Role in Restoring Ecosystem Services

Sacramento, California, USA

The conference is organized by the Soil Science Society of America (SSSA). Soils provide provisioning and regulating ecosystem services relevant to grand challenge areas of: 1) climate change adaptation and mitigation, 2) food and energy security, 3) water protection, 4) biotechnology for human health, 5) ecological sustainability, and 6) slowing of desertification. The purposes of this conference will be to evaluate knowledge strengths and gaps, encourage cross-disciplinary synergies to accelerate new learning, and prioritize research needs.

<https://www.soils.org/meetings/specialized-conferences/ecosystem-services>

March 7 – 8, 2014

56th Annual Meeting of the Western Division of the Canadian Association of Geographers

Victoria, BC, Canada

<http://www.geog.uvic.ca/dept/wcag/>

March 9 – 12, 2014

GEO2014 - The 12th Middle East Geosciences Conference and Exhibition

Bahrain, United Arab Emirates

It is organized and developed by the American Association of Petroleum Geologists (AAPG), the European Association of Geoscientists and Engineers (EAGE) and the Society of Exploration Geophysicists (SEG). Additionally, GEO is fully supported by the Dhahran Geoscience Society (DGS), the Bahrain Geoscience Society (BGS), the Geological Society of Oman (GSO), Emirates Society of Geoscientists (ESG) and the Qatar Geological Society in cooperation with a committee of national and international oil company representatives.

<http://www.geo2014.com/>

March 11 – 12, 2014

Oceanology International

London, United Kingdom

Oceanology International is the global forum where industry, academia and government share knowledge and connect with the marine technology and ocean science community, improving their strategies for measuring, exploiting, protecting and operating in the world's oceans. Established in 1969, Oceanology International features the world's largest exhibition for marine science and technology, several agenda-setting technical conferences, visiting vessels and waterside demonstrations, all free to attend.

<http://www.oceanologyinternational.com>

March 13 – 14, 2014

7th Colloquium Rock Mechanics - Theory and Practice with "Vienna-Leopold-Müller Lecture"

Vienna, Austria

Details: [Programme Circular](#)

www.ig.tuwien.ac.at

19 - 21 March 2014

Global land project international conference 2014

Berlin, Germany

The 2014 Global Land Project Open Science Meeting will synthesize and discuss the role of the land system as a platform for human-environment interactions, connecting local land use decisions to global impacts and responses.

Main conference themes:

1. Rethinking land change transitions: drastic changes in land cover and subtle changes in land management
2. Local land users in a tele-connected world: the role of human decision making on land use as both a driver and response to global environmental change
3. Impacts and responses: land systems changes to mitigate global environmental change impacts and adapt to increasing demands for food, fuel and ecosystem services
4. Land governance: the ways in which alternative approaches to governance of land resources can enhance the sustainability transition

<http://www.glp-osm2014.org/>

March 20-21, 2014

The mineral potential of the North Atlantic Craton (NAC)

University of St Andrews, United Kingdom

This event is organised by the Cardiff and St. Andrews University Chapters of the Society of Economic Geologists, and the Applied Mineralogy Special Interest Group of The Mineralogical Society of Great Britain and Ireland, in conjunction with the British Geological Survey and Geological Survey of Denmark and Greenland. This workshop, on the mineral potential of the North Atlantic Craton (NAC) as a whole, is aimed at initiating and furthering trans-Atlantic collaboration in understanding the Archaean cratonic controls on ore deposit formation through time. The Archaean high-grade gneiss terrain of the NAC stretches from Labrador, Canada, through Greenland and into NW Scotland, UK. Acceleration in exploration efforts for various commodities across this region, particularly in Greenland, has highlighted the potential of its mineral resources. More recently, the importance of a craton-specific approach to mineral exploration has been realised.

<http://www.nac-conference2014.org.uk/>

March 22 – 23, 2014

Gordon Research Seminar: Natural Gas Hydrates Systems

Galveston, Texas, United States

http://www.grc.org/programs.aspx?year=2014&program=grs_natgas

March 24 – 26, 2014

1st International gathering on Medical Geology in Africa (ISMGAf)

University of Johannesburg, Republic of South Africa

Historically, the two disciplines namely the “geological sciences” and the “medical sciences” were regarded as completely independent fields of scientific disciplines. However, recent advances in science and technology have proven that the geology of an area can have a direct impact on the re-

gional input of elements and nanoparticles of minerals into soil, air and water. In turn these inputs, depending on composition and concentrations, may result in beneficial or harmful health effects in humans, animals and/or plants. Therefore, by understanding the geological history of our country and the African continent in general, we will contribute towards a better and deeper insight into our understanding and mitigation of a range of natural hazards that affect our society.

<http://www.uj.ac.za/geology>

March 24 – 28, 2014

EGU Topical Conference Series

9th Alexander von Humboldt Conference 2014

High Impact Natural Hazards Related to the Euro-Mediterranean Region

Istanbul, Turkey

The aim of this 9th Alexander von Humboldt International Conference is to open a forum on natural hazard events that are characterized by high impact and large destructive potential, particularly related to the Euro-Mediterranean Region including Turkey (e.g., Marmara Region).

High impact natural events may profoundly affect, or even destroy, the socio-economic fabric over different spatial and temporal scales. These events often have a low probability of occurrence, with society often unprepared for the resultant impact. Earth Scientists are foremost in studying and understanding the geo-processes and uncertainties surrounding these hazards.

This one week conference in Istanbul will bring together an interdisciplinary group of scientists to study a variety of high-impact natural hazards related to the Mediterranean Region, including earthquakes, tsunamis, volcanoes, hydro-meteorological and other hazards. There will also be sessions on complexity analysis applied to natural hazards, loss modelling, risk assessment, communications and education of the public and policy makers, and what is appropriate good practice when proposing natural hazard "predictions". We foresee the theme of this conference to be of particular interest to academic, industry and government experts on geophysics, geology, physical geography, seismology, applied mathematics, complexity physics, remote sensing, and engineering. We also very much welcome social scientists.

Within the five days of this conference, we will have half a dozen international experts as key-note speakers. We actively solicit both oral and poster presentations, and will particularly be promoting discussion and debates, in various formats, including time for poster presentations to do 2 minute summaries in front of the entire group.

<http://www.avh9.net/>

April 6 – 9, 2014

AAPG 2014 Annual Convention & Exhibition

Houston, Texas, USA

<http://www.aapg.org/houston2014/>

April 7 – 9, 2014

VIII International Brown Coal Mining Congress "Brown Coal - Opportunities and Threats"

Belchatow, Poland

Details: [First Circular](#)

April 7-10, 2014

6th International geological and geophysical conference and exhibition "Saint Petersburg 2014. Geosciences - Investing in the Future".

Saint Petersburg, Russia

It is organized by the European Association of Geoscientists and Engineers (EAGE).

It is the largest geoscience event in the Russian Federation. The conference is organized bi-annually in Saint Petersburg, Russia. In 2012, around 800 visitors (Russian and foreign) attended the event and over 40 petroleum and service companies joined in the exhibition.

<http://eage.org/events/index.php?eventid=1010&Opendivs=s3>

April 8 – 12, 2014

Association of American Geographers (AAG) Annual Meeting

Tampa Bay, Florida, USA

<http://www.aag.org/annualmeeting>

April 10 – 11, 2014

1st Deep Geothermal Days

The conference is organized by the French Geothermal Association (AFPG)

This conference will focus on low/high enthalpy conventional fields as well as on Enhanced/Engineered Geothermal System.

<http://www.d-geo-d.com/>

April 21-25, 2014

10th anniversary Scientific & Practical Conference and Exhibition "Engineering Geophysics 2014"

Gelendzhik, Russia

"Engineering Geophysics 2014" will be organized bringing together highly qualified experts working in the fields of engineering geology and geophysics, hydrogeology, ore geology, ecology, archaeology, as well as those charged with monitoring the state of roads, railways, airports, and waterworks.

Please note Russian is conference working language.

<http://eage.org/events/index.php?eventid=1096&Opendivs=s3>

April 22 – 27, 2014

MEARIM - Third Middle East and Africa International Astronomical Union (IAU) Regional Meeting.

Beirut, Lebanon

<http://www.iau.org/science/events/1087/>

April 23-25, 2014

The International Forum "Integrated Geospatial Solutions – the Future of Information Technologies"

It is one of the significant events for worldwide geospatial community

ATLAS PARK-HOTEL, Sudakhovo village, Moscow Region, Russia.

Since 2007 Sovzond Company has been the organizer of the yearly International Conference "Remote Sensing – the Synergy of High Technologies". This conference is an excellent opportunity for specialists engaged in the fields of geospatial technologies and remote sensing to gain knowledge and exchange experience. In 2013 the conference has gathered over 300 delegates from Russia, Belarus, Kazakhstan, Latvia, Ukraine, Canada, France, Germany, Italy, Japan, Norway, Spain, Sweden, Switzerland, United Kingdom and USA.

In 2014 leaders and specialists of ministries and agencies applying GIS and geoportals will present their new developments (the Ministry of Natural Resources and Environment of the Russian Federation, the Ministry of Agriculture of the Russian Federation, the Russian Federal Space Agency and etc.). The leading operators and developers of space systems (JSC Russian Space Systems, OJSC Research Institute of Precision Instruments, DigitalGlobe Inc., GeoEye Inc., RapidEye SÀRL, MDA Geospatial Services Inc., e-GEOS S.p.A., PASCO CORPORATION etc.), as well as world-known designers of geoinformation applications and software for data processing (Esri Inc. and Exelis Visual Information Solutions, Inc., Trimble Germany GmbH and etc.); developers and suppliers of different solutions and technologies: ground Earth remote sensing data receiving and processing complexes, unmanned aerial systems, applications for data visualizations and many others will take an active part in the Forum.

<http://www.sovzondconference.ru/2014/eng/>

April 26 – 27, 2014
USA Science & Engineering Festival
Washington, DC, USA
<http://www.aag.org/annualmeeting>

April 26 – 28, 2014
International Conference on Continental Dynamics
Xi'an, China

The International Conference on Continental Dynamics (ICCD) will involve open discussion and exchange of ideas on a wide range of topics related to the formation and destruction of continents, cratons and supercontinents and their relationship to tectonics and deep mantle dynamics.

Details: [First Circular](#)

April 27 – May 2, 2014
European Geosciences Union General Assembly 2014

Vienna, Austria

Session # NH9.8. Geoethics: Ethical Challenges In Communication, Geoeducation And Management of Natural Hazards

Geoethics deals with the ethical, social and cultural implications of Earth Sciences education, research and practice and the social role and responsibility of geoscientists in conducting their activities. It concerns theoretical and practical aspects of decisions regarding management and mitigation of geohazards, use of geo-resources, development of geoeducational strategies and the search for solutions to geo-environmental problems. Geoethics should become an essential point of reference for any action on land, water and atmosphere use for which all stake-holders and decision-makers are held accountable.

The 2012 and 2013 sessions on Geoethics at the EGU General Assembly were a great success and demonstrated the urgent need for the scientific community to reflect on how to best serve society, improve the quality of human life and promote sustainable development on planet Earth.

Among the critical ethical issues faced by geoscientists, natural hazards have a primary importance. The deaths, injuries, displacement and economic costs associated with them are increasing, in part due to rapid population increase, occupation of marginal/unsafe land and the misuse of land.

Many natural disasters can be prevented and/or their impact reduced. Geoscientists must play a fundamental role in protecting society, by educating the youths, communicating their knowledge and scientific results to the public and policy makers. This includes suggesting models, methods and ideas to inform and influence decision making for risk reduction programs, designing and implementing risk reduction strategies, organizing geoeducation activities and promoting environmentally sustainable and/or socially compatible use of natural resources.

Conveners invite authors to submit abstracts with their views, reflections, suggestions and experiences in an ethical perspective that could be helpful in understanding problems and finding solutions for a successful interaction between scientific community, media, institutions and local populations, with the overall aim of improving the effectiveness of measures to protect people and their assets from natural hazards.

May 4 – 7, 2014
2014 NGWA Groundwater Summit (#5095)
Denver, Colorado, USA
<http://groundwatersummit.org/>

May 5-8, 2014
The 1st International Conference Climate Changes and Sustainable Development of Natural Resources
Cairo, Egypt

Organized by Scientific Society for Environmental Development (SSED), Kafrelsheikh University
<http://www.esss.org.eg/firstofcrops.html>

May 8, 2014

NGWA Conference on Characterization of Deep Groundwater (#5042)

Westin Denver Downtown, Denver, Colorado, USA

<http://www.ngwa.org/Events-Education/conferences/Pages/5042may14.aspx>

May 11 – 16, 2014

5th Edition of the International Congress on Arsenic in the Environment

Buenos Aires, Argentina

<http://www.as2014.com.ar>

May 12 – 16, 2014

CSPG Canadian Society of Petroleum Geologists GeoConvention 2014

Calgary, Alberta, Canada

<http://www.geoconvention.com/>

18 - 23 May 2014

JASM 2014 - Joint Aquatic Sciences Meeting. Association for the Sciences of Limnology and Oceanography

Portland, Oregon, USA

<http://www.aslo.org/meetings/portland2014/sessions/>

May 20 – 22, 2014

MINEFULL 2014 - 11th International Symposium on Mining with Backfill

Perth, Australia

The 11th International Symposium on Mining with Backfill will explore both the theoretical and practical aspects of the application of mine fill, with many case studies expected from both underground and open pit mines.

<http://www.minefill2014.com/>

May 21-23, 2014

GAC-MAC Joint Annual Meeting

The meeting is organized by the Geological Association of Canada, the Mineralogical Association of Canada, the Atlantic Geoscience Society and the University of New Brunswick, the Fredericton 2014 Organizing Committee.

The Fredericton campus of the University of New Brunswick, Canada.

Fredericton is the Provincial capital of New Brunswick. The region has a long history of earth science education and exploration, beginning with [Abraham Gesner](#), who was appointed the government geologist for New Brunswick from 1838 to 1842, the first such position in Canada. The 2014 GACMAC slogan reflects in part the 175 years of geoscience in the region inspired by Gesner and his discoveries.

Fredericton is centrally located only a short distance from the world's richest Pb-Zn-Ag deposits in the Bathurst Mining Camp, rare-metal intrusion-related deposits such as Sisson Brook and Mt. Pleasant, and spectacular exposures of hydrocarbon-bearing Carboniferous maritime basin sediments. A variety of pre- and post-conference field trips will examine Appalachian collisional processes, exquisitely-preserved Devonian volcanic sequences and fossil beds, a range of ore deposits and hydrocarbon reservoirs, as well as quaternary and coastal geology of the Province. A diverse scientific program is currently being developed including a MAC-sponsored short course of cathodoluminescence applications in geoscience and GAC sponsored workshops on remote sensing and structural geology of ore deposits.

<http://www.unb.ca/conferences/gacmac2014/index.html>

May 21 – 23, 2014

DFI-EFFC International Conference on Piling and Deep Foundations

Stockholm, Sweden

<https://www.regonline.com/builder/site/Default.aspx?EventID=1221506>

May 22-25, 2014

16th Congress of Geologists of Serbia

Hotel "Lepeski Vir", Donji Milanovac, Serbia

<http://www.sgd.rs/eng/>

May 26 – 28, 2014

GeoShanghai 2014 – International Conference on Geotechnical Engineering

Shanghai, China

GeoShanghai is a series international conference on geotechnical engineering hold in Shanghai once four years. Themes 2014: Soil behavior; Geomechanics; Unsaturated soil mechanics; Seepage and porous mechanics; Rock mechanics and rock engineering; Geosynthetics; Geoinformatics; Geotechnical in-situ testing & monitoring; Railway geotechnics & Offshore geotechnics & Mining geotechnics; Energy-related geotechnics; Ground improvement; Soil dynamics & Earthquake engineering; Geoenvironmental engineering; Tunneling and underground constructions & Deep excavations & Retaining structures & Drilled shafts & Deep foundations & Engineering in karst terrain; Behavior of biotreated geomaterials and foundations; Sustainability in geotechnical engineering & Impact of the climatic factors on infrastructure; New frontiers in urban geotechnology & Case studies; Pavement materials and structures

<http://geoshanghai2014.org/>

May 26 – 30, 2014

Canadian Association of Geographers Annual Meeting

Brock University, St. Catherines, Ontario, Canada

<http://www.brocku.ca/social-sciences/undergraduate-programs/geography/cag2014>

May 26-31, 2014

International Research-to-practice Conference “Integrated Use and Protection of underground spaces” devoted to the 100th anniversary of scientific and tourist-excursion activities in Kungur Ice Cave and V.S. Lukin's 100th birthday anniversary

Fillipovka Village and Kungur Ice Cave, Perm Region, Russia

The purpose of the conference is to discuss the problems of scientific study and exploitation of underground spaces, management, tourism and recreation in the karst areas.

The conference will discuss the issues in 2 directions: 1st section is dedicated to the 100th anniversary of tourism and research activities in Kungur Ice Cave, 2nd section - the memory of famous karst researcher V.S. Lukin:

1. Underground space as an object of study.
2. Problems of management, tourism and recreation in the karst areas.
3. History of tour exploitation of underground spaces.
4. Protection of karst landscapes and caves.
5. Problems of Engineering Geology of karst areas.
6. Monitoring of karst processes.
7. Public education and environmental education in the karst areas.

For registration requirements and paper submission guidelines please visit:

<http://www.mi-perm.ru/information/conference/icecave.>

Conference Secretariat:

Scientific Secretary of Mining Institute of Ural branch of RAS, Candidate of Geological and Mineralogical Sciences Yuriy Stepanov - stepanov@mi-perm.ru,

Senior researcher of Mining Institute of Ural branch of RAS, Associate professor of tourism of PSU, PhD Olga Kadebskaya - icecave@bk.ru

May 27 – 29, 2014

International Society for Rock Mechanics (ISRM) EUROCK 2014 - ISRM European Regional Symposium on Rock Engineering and Rock Mechanics Structures in and on the Rock Mass

Vigo, Spain

<http://www.eurock2014.com>

June 1-6, 2014

International Conference on Atmospheric Dust.

Castellaneta Marina, Italy

www.dust2014.org

June 2–6, 2014

World Landslide Forum III.

Beijing, China

The 3rd World Landslide Forum aims at the further developing the outcomes of the Second Forum in Rome 2011 by providing a global cross-cutting information and cooperation platform for all types of organizations representing academia, United Nations organizations, governments, private enterprises and individuals that contribute to landslide other related Earth system risk reduction strategies.

Topical and thematic session are envisaged on: 1) Recognition and mechanics; 2) Monitoring, prediction and warning; 3) Modeling and advanced technology; 4) Risk controlling on key facilities and urbanization; 5) Natural dams and landslides in reservoirs; 6) Prevention and reconstruction for earthquake disasters; 7) Community-based early warning and emergency response; 8) Risk management and policies

20th World Congress of Soil Science

Jeju, Korea

<http://www.20wcss.org/>

June 8-13, 2014

Goldschmidt 2014. Geochemical Society and the European Association of Geochemistry

Sacramento, California, USA

Goldschmidt2014 will follow the pattern established for the recent Goldschmidt conferences, and should be the prime forum for all recent developments in Geochemistry and related fields

<http://goldschmidt.info/2014/index>

June 9 – 13, 2014

7th International Conference on Environmental Science and Technology

Houston, Texas, USA

Details: [circular](#)

June 11–12, 2014

3rd Tight & Shale Gas Summit

Edinburgh, Scotland, UK

The two day event will bring together key industry stakeholders from major, independent and national gas operating companies service and supply companies from the upstream gas industry, consultants in the energy sector, research organisations, banks, fund managers, private equity providers,

energy analysts & regulators to discuss on-going challenges and opportunities on the Uncertain Fracking Future.

July 20 – 25, 2014

International Symposium on metal-hydrogen systems

Salford, Greater Manchester, United Kingdom

The development of hydrogen storage materials is expected to play a key role in the next-generation hydrogen energy system, the introduction of which is planned to take place from 2015, and in stationary energy storage, which will ensure a stable supply of renewably powered electricity.

MH2014 will serve as a timely meeting place to discuss the goals and strategies of hydride R&D for the imminent establishment of a hydrogen economy and a sustainable society. Fittingly, the symposium will be held in Salford Quays, scene of a major urban regeneration project, replacing one of the most significant developments of the Industrial Revolution which can be said to have started in Manchester.

Various metal hydride systems are already widely used in industrial products and processes to achieve higher energy efficiency. For example, electrochemical hydrogen storage has been com-

mercialized as Ni-MH batteries, which are widely used in hybrid vehicles and portable electric appliances. The Hydriding, Disproportionation, Desorption and Recombination (HDDR) process is an important technology for the production of strong rare-earth magnets. Discoveries of novel material-hydrogen systems, which will no doubt be reported at MH2014, promise new possibilities for industrial applications.

GeoMod2014 - Modelling in Geoscience

Berlin, Germany

GeoMod is a biennial conference dedicated to latest results of analogue and numerical modelling of lithospheric and mantle deformation.

At GeoMod2014 we will focus on rheology and deformation at a wide range of temporal and spatial scales: from earthquakes to long-term deformation, from micro-structures to orogens and subduction systems, as well as volcanotectonics and the interaction between tectonics and surface processes.

The conference will be followed by a 2-day short course on "Constitutive Laws: from Observation to Implementation in Models" with lectures, lab visits and practical exercises.

1st International Conference & Exhibition “Ural Oil & Gas-2014”

EC “Yekaterinburg-EXPO”, Yekaterinburg, Russia

The Ural region is a place of concentration of the largest oil and gas fields relating to the West Siberian oil-and-gas province in which 66,7% of domestic inventories of oil (6% world) and 77,8% of inventories of gas (26% - world) are concentrated. According to Energy Strategy of Russia for the period till 2030 by 2030 Ural federal district will reserve line items of the main oil and gas region of Russia delivering energy carriers in power scarce regions of the country and for export.

The main idea and the purpose of «Ural Oil & Gas» is launching in the city Yekaterinburg – Ural Federal District capital, and one of the largest industrial centers of the Russia, an authoritative oil and gas international forum which will unite on one dialogue platform the gas and oil producing companies of the region, suppliers of the equipment and the latest technologies, engineering companies and scientific innovations.

The format 2 in 1: the exhibition and the conference, creates a platform for the large-scale event covering possibility of demonstration the industry innovations «alive» at the exhibition and at the same time discussion of industry global subjects, region key projects, decision making at high level at the conference.

Different aspects of the Neoproterozoic-Lower Palaeozoic stratigraphy, palaeontology, geochemistry and ore deposits of the Atlas Mountains

Ouarzazate, Morocco

During the last two decades, the National Program of Geological Mapping undertaken by the Moroccan Ministry of Energy, Mines, Water and Environment and numerous PhD theses focused on different aspects of the Neoproterozoic-Lower Palaeozoic stratigraphy, palaeontology, geochemistry and ore deposits of the Atlas Mountains have fuelled a flood of new information and revisions with reliable isotopic data of the Ediacaran (former Précambrien-III) and Cambrian volcanosedimentary complexes.

Recent discussions of Moroccan strata to select new global GSSP by the International Subcommittees on Ediacaran and Cambrian Stratigraphy have converged in the joint organization of an international meeting in 2014, in which several of these potential GSSPs will be visited.

The conference will take place in Ouarzazate, nicknamed the door of the desert, a major tourist destination due to the location of the Atlas film Studios, and a base for excursions across the Drâa valley and into the desert (erg). Scientific sessions in Ouarzazate will be followed by a regional trip to visit Ediacaran and Cambrian localities in the Anti-Atlas crossing the Ouaouafengha, Siroua, Zenaga and Saghro inliers. The localities to be visited include well-exposed Ediacaran volcanosedimentary complexes with lacustrine carbonates (Ouarzazate Group) and Cambrian carbonate stromatolite and microbial-archaeocyathan reef complexes (Adoudou, Lie-de-vin, Igoudine and Amouslek formations) and fossiliferous carbonate-siliciclastic units, such as the Issafen, Jbel Wawrmast and Bailiella formations.

Publications

1. Abstract proceedings (title, authors, addresses, text and references – less than 500 words).
Deadline 15th June 2014, to be sent to lea.devaere@ed.univ-lille1.fr
2. Thematic short papers focused on palaeontological aspects published in *Annales de Paléontologie* (Paris). Deadline 31st October 2014, directly online (for questions, contact Sebastien.Clausen@univ-lille1.fr).
3. Field Guide published in Moroccan editorial.

Society of Economic Geologists (SEG) 2014 Conference: Building Exploration Capability for the 21st Century

Keystone, Colorado, USA

As the global exploration industry confronts the twin megatrends of increasing raw material demand and depletion of near-surface deposits, we need to build a capability to rise to this challenge. Doing this will require the best new science, the best new tools, and the best new ways of pragmatically applying them. It will also need new concepts and technologies from fields that we currently don't even consider as economic geology. Much of this is already happening today.

The goal of SEG 2014 is to provide a forum to bring together in one conference the key new work that is contributing to this new capability. The conference will be a meeting where the broadest spectrum of economic geology stakeholders can interact, covering topics that range from advanced academic studies to practical application.

September 28 – October 1, 2014

53rd Annual Conference on Metallurgists – COM 2014

Vancouver, BC, Canada

The theme of the conference is Prosperity through Process Advancements and aspects of processing weave through every one of the 13 symposia. From base and light metals to rare earths to nanomaterials, processes are critical to making metals and materials in an economical and safe way, and this is highlighted at COM 2014 with strong technical programming over a range of topics, including process control, flowsheet development, and materials manufacturing. Safety and risk assessment are key components of sound process development, and this conference has an excellent collection of symposia on risk management, process safety management, failure modelling, and arsenic metallurgy.

The 10th annual Mining and Exploration forum – MINEX Russia 2014

Moscow, Russia

The Forum is one of the largest and most prominent events addressing issues of exploration, mining and processing of solid minerals in Russia. In 2013 the forum was attended by more than 650 leaders and managers of mining companies and public organizations from Russia, Kazakhstan, Kyrgyzstan, Ukraine and the countries of the European Economic Community, North America, Africa, Asia and Australia.

In 2013 main topic of the Forum this year was "Mining in a challenging economic environment." MINEX Forum provided a powerful incentive for the exchange of experiences and finding the best solutions to increase efficiency and investment attractiveness of Russian mining companies. The Forum traditionally provides diversified platform for business meetings, signing of agreements as well as for organizing presentations on many aspects of mining and mineral exploration in Russia and covering wide range of topics from modern technologies for prospecting and exploration of new fields to financing mining projects and setting up international partnerships. Many bilateral and multilateral meetings with government delegations, business people and investors are held during the Forum.
